1st Generation (Web access)

2nd Generation (Web site building)

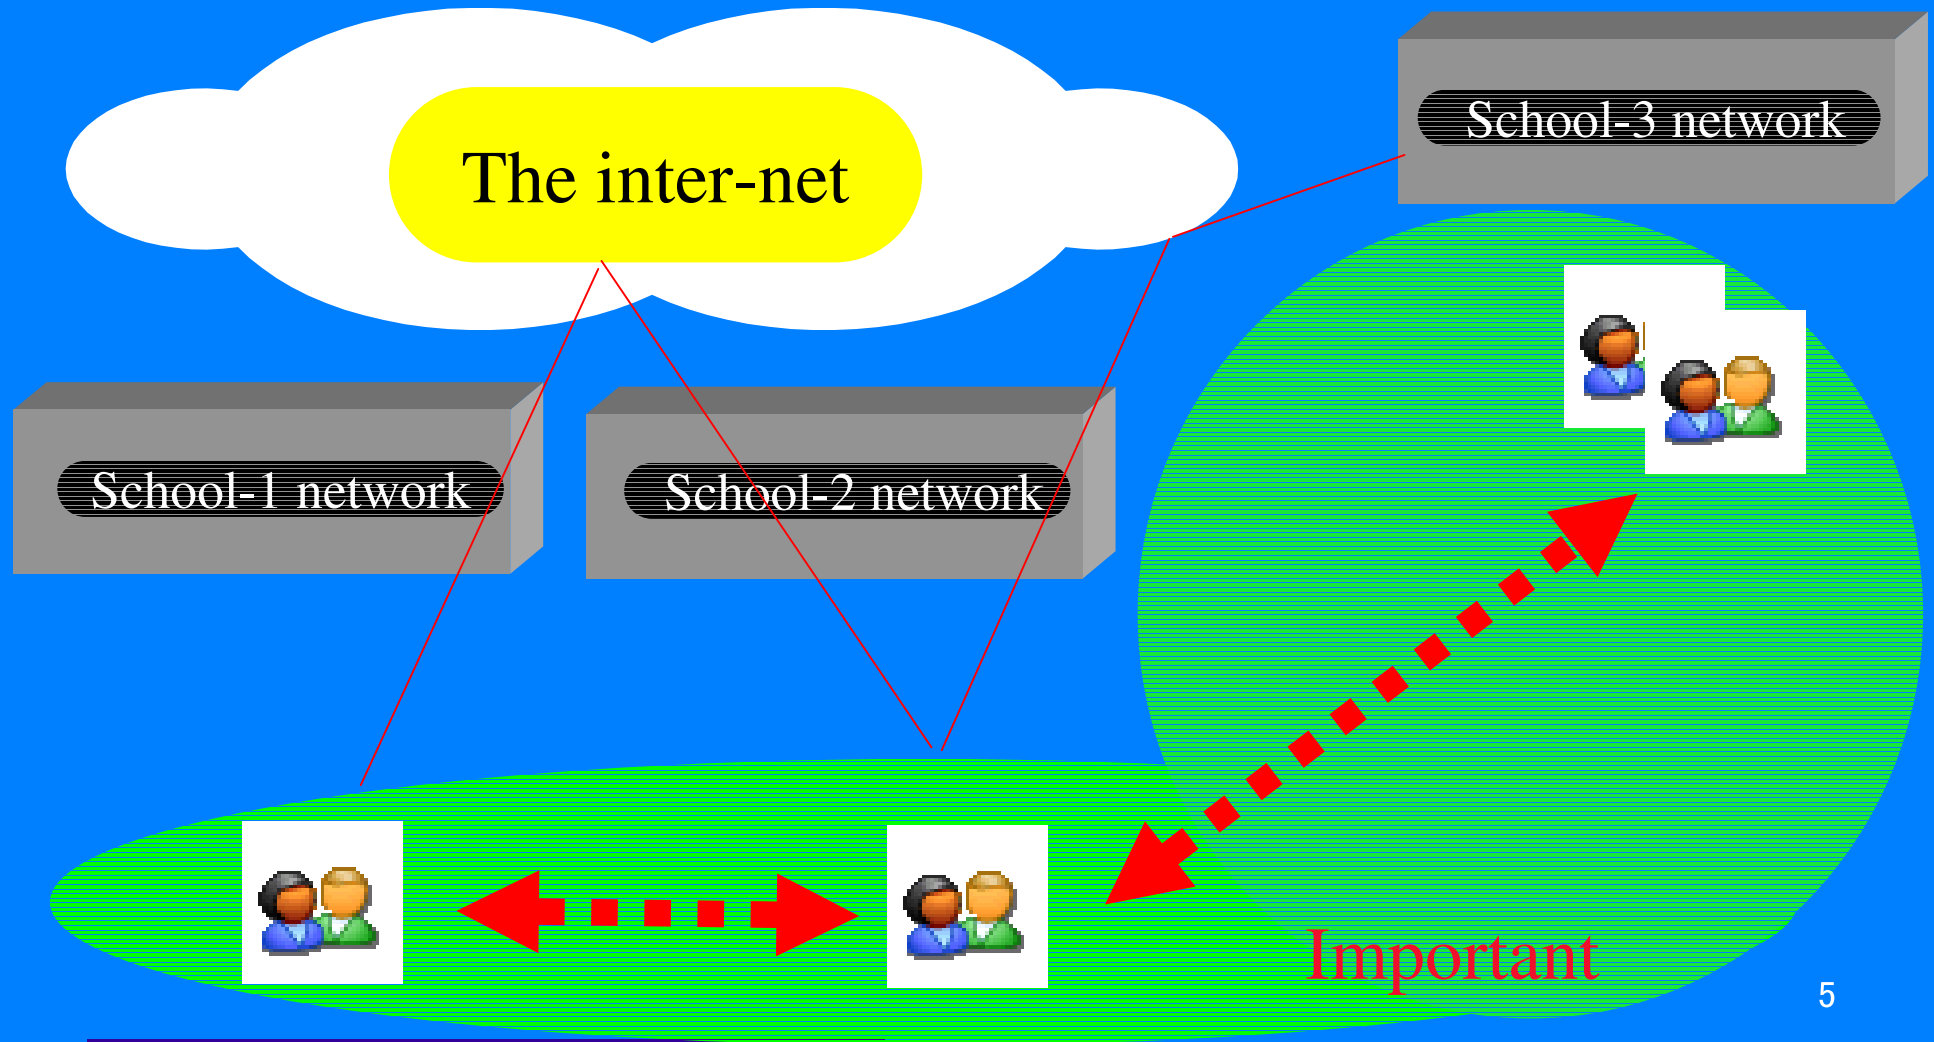

Why not direct Communication among schools?

•
•
•

The inter-net is only a mean of communication

We can build it easily with a little costs

1.Camera (donation)

2.Media encoder (free) for Broadcast

3.Media player (free) for Watching and Hearing

4.IP messenger (free) for keyboard Conversation

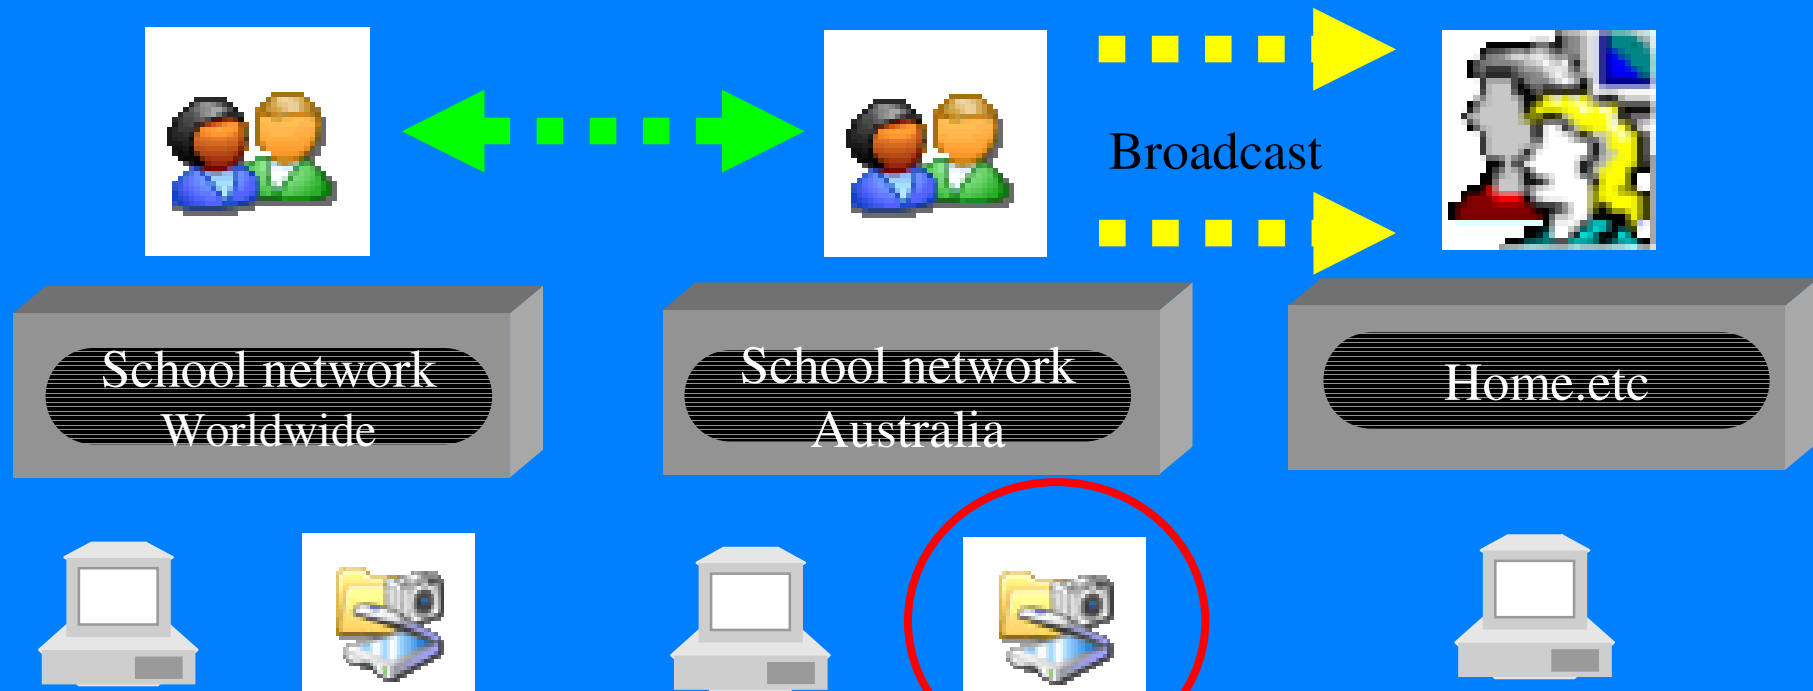

School

1.Media player (free)
for Watching and Hearing

Home

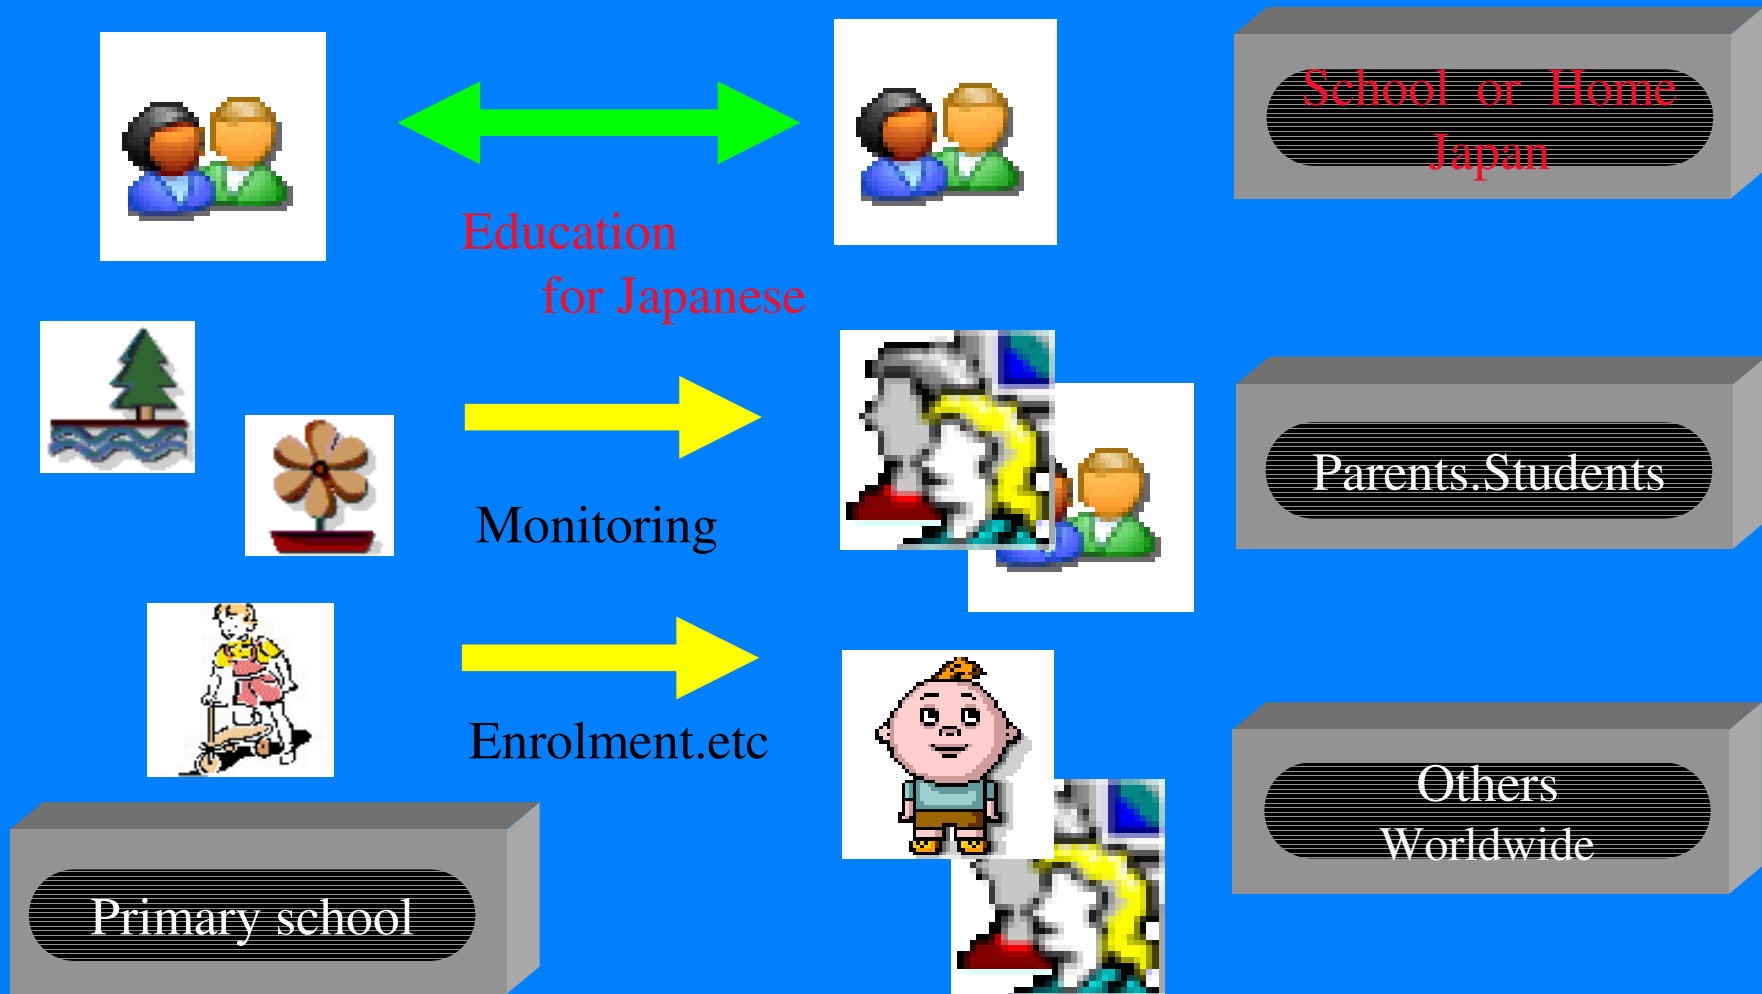

Next Generation (Live communication)

A little additional costs = 20-35A\$

The inter-net

Application

-
-

Security

1. We can check who is connecting (ip address).
2. We can restrict unknown ip address.
3. Most outsiders can not find this access numbers.
We need to inform this access numbers to our friends in advance.

-
-
-

Requirement

1. Maybe you need to check your firewall system.
2. Your proposal for the contact with Japanese school.
